SC WATER RIGHTS
SALT LAKE

Dear Mr Olds,

Mr Larsen & Mr Sims from your office & Mr Carpenter from the Cedar City office, came down to the Escalante Valley Area and started to bring farmers into complyence on the underground water. I am a farmer in the Escalante Valley, with underground water rights. They started the job but didn't finish it. There is farmers in the Enterprise Area & the New Castle Area who have both surface & underground water. With the drouth & lack of surface water, they are watering completely with underground. One farmer, 10 miles north of New Castle, is still watering a full circle with water that was transfered off 3 yrs ago.

Some farmers had to cut back & others is allowed to pump more water than they have a right to, this a case of pure discrimination.

Thank you. Sincerly
a farmer who is in full Compliance
