The East Jordan Irrigation Co.

all corporations in Salt Lake County in said

Territory the parties of the second part

Witnesseth. That the said parties of the first part and each of them for and in consideration of the covenants and agreements hereinafter contained and the sum of Eight Thousand Dollars to them in hand paid by the said parties of the second part, the receipt whereof is hereby acknowledged, have granted, bargained, sold, conveyed and confirmed unto the said parties of the second part and to their and each of their successors and assigns forever the right to maintain the dam in the Jordan River known as the "Jordan Dam" situated at or near the boundary line between Salt Lake and Utah Counties as at present constructed. An opening or waterway through said dam to be left at all times free and open except as hereinafter specified for the passage of water as follows, to wit: The width of said opening to be as at present established including supports and uprights, the whole width including such support being seventy two feet more or less. The bottom of such opening or waterway in said dam to be six inches above or higher than the bottom of the opening or waterway in said dam as at present constructed when free from boards or temporary obstructions. Also the right free from interference or liability for damages to flow the lands of the said

parties of the first part or either of them to the extent which the dam as above described may cause the same to be flowed by the waters of the said Jordan River, Utah Lake or otherwise. Also the right in addition to the forgoing, free from liability for damage, to flow the lands of the said parties of the first part, or either of them, to the extent which may be caused by placing obstructions in the waterway in said dam hereinbefore mentioned according to the limitations hereinafter specified for the purpose of holding back or retaining the waters in Utah Lake at an elevation or height not to exceede three feet and three and one half inches above the points heretofore established and recognized as low watermark in said Lake when the waters in said lake would otherwise naturally fall below such height or elevation that the water so held back might be saved for use by the said parties of the second part when needed. The lands as severally owned by the said parties of the first part hereinbefore mentioned and which may be affected by these grants are situated in Utah County adjacent or near to the Utah Lake in the Territory of Utah and are more particularly described in Exhibit "A" hereto annexed and made a part of this Indenture.

To have and to hold the said granted rights

easements and servitudes, together with all the rights and privileges in any wise pertaining thereto, unto the said parties of the second part and to their and each of their successors and assigns forever.

For the purpose of better carrying the foregoing into effect it is hereby mutually agreed by and between the parties hereto that on or before the first day of January in each year the parties hereto shall each respectively appoint two persons and the four persons thus appointed shall meet together on or before the first day of February in each year and elect an umpire a disinterested person who must not be a resident of either Salt Lake or Utah Counties and each of said persons before entering upon the duties herein specified shall enter into bonds in the sum of Two Thousand Dollars for the faithful performance thereof to the satisfaction or acceptance of the Probate Judge of either Salt Lake or Utah Counties. The persons so appointed shall continue to act until others are appointed and qualified to succeed them.

The said persons shall constitute a Board and are hereby empowered as the legally constituted agents of the parties hereto, to determine and direct when and to what extent obstructions may be placed in the said waterway of the dam for the purpose of storing the lake with water

for future use not to exceed the highest elevation herein before specified.

Provided that if in any year on or after the fifteenth day of March it shall be ascertained by said Board that the fall of snow during the past winter has been light, and if the said Board are of the opinion that the waters of Utah Lake will probably not rise during the current season to the highest level herein before mentioned then the said Board shall permit the said parties of the second part to raise said dam to a hight, to be fixed by said Board, which will cause the water of said Lake to rise to said level and if it shall be ascertained by experience and observation that the said parties of the second part can obtain all the water necessary for irrigation purposes by keeping the waterway of the dam open until the waters of Utah Lake shall have receded below the highest level mentioned then the said Board shall require the waterway to be kept open until the water recedes to such level as the Board shall deem sufficient to supply the said parties of the second part with water and

Provided further: That when at any time in each year to be fixed by said Board the high water of Utah Lake shall have receded to the highest elevation above herein specified

the parties of the second part shall have the right without hindrance from any person or persons to cause the waters of Utah Lake to be held back by regulating said dam not to exceed the elevation above mentioned and to use the said water as they may desire until such date on or after the first day of October as the said Board shall decide at which date the said parties of the second part shall open the entire waterway of said dam (excepting the uprights) down to the sill or base thereof and permit the said water to run free.

That the members of said Board shall each receive compensation at the rate of Four Dollars per day with actual travelling expenses which the parties of the second part hereby agree to pay.

It is further agreed that the said parties of the second part shall have the privilege of cutting through the bar in the Lake at the head of the said Jordan River and of lowering the same to such a depth as by an accurate survey shall be considered proper so as to permit a more rapid flow of water and to secure to themselves a more reliable supply of water by being enabled to draw it from a lower level in the Lake than is at present possible. Provided a gate or dam is put in at a suitable place in the river or at the bar and thus be able to make and maintain

a reservoir in the interests of the parties of the second part that shall be permanent. Also to have a right to use Utah Lake as a reservoir with full right to maintain their dam as at present constructed and subject to the forgoing regulations.

In witness whereof the parties of the first part have hereunto set their hands and seal and the said parties of the second part have each caused its corporate name and seal to be subscribed and affixed the day and year first above written.
