I'm writing you a note to let you know I'm not happy the way you people of Utah handle the water situation. I'm fed up with the whole thing. Its just a yearly routine for you Utah people to come over here you don't really accomplish any thing Henderson from Wyo. calls all the shots, and we people of Utah don't have any voting power at all on who the water commisioner should be and on the wages he should be paid. He is not near the commissioner he was when he first took the job. He has his favorites ~~and will~~

and will lie, and you people have given him too much authority. He is trying to hold down 2 jobs and has become a little Hitler and dictates and bones to throw around his weight. I'm getting fed up with our Ike-ditch water holders having to send our water 1902 or 1912 rights 12 feet down the Burnt fork creek year after year. you don't have any measuring Instruments to tell how much shrinkage there is, or even if our 12 feet gets there if any or how much.

another thing I don't agree

With is people calling regulations on water. I think that if it comes to that the States need to examine the situation and call it not private individuals. The way it is now its always the ones on the lower Wyoming end that calls for regulations kind of a click.

Sincerely,

Milton Beck
