Burnt Fork Division

Field headgate requirement = 3.00 AF/ACR.

Conveyance losses vary.

Gregory Basin.

Hanks can take 100 AF plus their 1991 - through canal
thinking of abandoning their 1991
and bailing out of G. Basin canal because
of cost of headgate replacement.

Todd Covolo.

If they are under double duty regulation on West Beaver Creek not a factor.

not being regulated it will be difficult for them to show injury on this right.

periods when very high flow

memo says everyone has to have double duty before they can take water (Wyo & Utah).

West Beaver / Fallon Creek

Todd has looked at it doesn't think they is irrigation once they go into regulation they stop taking water.

water right for storage

before this reg. [illegible]

above Lyman Graying have meas. devices

only about 5 cfs goes into Lyman Graying - it has a right for about 5 cfs.
