	Tot. acs.=38.00																																				

1/ 6.30 cfs. intermittently diverted at all these points

2/ When water supply for W.U.C. Nos. 9, 11, 12, 14, 17, 18 drops below their total flow-right of 6.3 cfs., 1.0 cfs. can be delivered out of Oak Cr under W.U.C. Nos. 15, 16, 97 and 98 to supply a total of 6.3 cfs. If water is available for Claim Nos. 9, 11, 12, 14, 17, 18 and is still below 6.30 cfs, then the diversion of water under W.U.C. Nos. 43, 44, and 83 are to be reduced proportionately to maintain 6.30 cfs.

3/ This diversion can be checked occasionally, but will not require constant supervision.
