WATER RIGHTS
SALT LAKE

Randolph, Utah
Sunday May 5-1991

Mr. Bill Nielson

I have been hired by The Randolph Irr. Co. to run The Water for Them again This year. & I was told to take the Water over on The 1st May & Put it on time. Which I have done.

I Went up to Spring Canyon. Wed. after Noon May 1st. You had all The Water.

The Flume read 1.02=3.17 Sec. ft.

I Took The Water from your Ditch, & Ran it all Down The Creek.

I Went up to Spring Canyon This Morning: May 5: & you had all The Water

I Put it back on The Creek,

I Talk to Ralph Argyle, & "he told me me to Fight With you, & Let you have all The Wa you Want, but for me to take The Same amount you take out of The Reservoir & Chang it against your Shares. & When your wat is Gone you Will be out of Water."

The Flume in Spring Canyon to-day read 1.02: or 3.17 Sec ft.

You are allowed 1 Sec. ft. Per hour day, So Th More you take The Sooner you Will be out of Water.

I have my Orders & The Water board are behind me.

If you have any Problems With This Lie, The board Members.

William E. Morris
(Water Master)
