Burntfork Wyo 10/24/1946

State Engineer State capitol
Salt Lake city Utah

Dear mr Watson: am very sory to have miss informed you as to being in salt lake and seeing you: it was most impo-sable as I am alone and failed to get some one to care for my chores, I will get a pertision of the Burntfork water users asking to have the Burntfork Public Irrigation District be Retained and not changed in any way as the water stored in Hoop Lake is all of the Burntfork except a small Potion from East Beaver which would only take care of the Hanks Portion as was in the original filings: and by so doing it prevents making a racket out of it.

Respfully yours
Wm McGinnis
