Burntfork Wyo July 4 - 1942

Mr Watson State Engineer State Capitol

Salt Lake City Utah

Dear Mr Watson: I had no idea that it would be a big job to aply to your instructions to get a water commissioner as it realy is.

The Interstate people wants no commissioner as a few of the users: saying what do they want with a commissioner they have all the water they want.

the ones of us who are lower deversion can get what that are left it any

If you will apoint Frank O Mahoney I am sure he will be fair and his work will be satisfactory in your office and to all who do not infringe: and would be would be very much aproved by your office.

trusting that we may have a water commissioned at once as we are searously in need

The Interstate turned Gland Lake loose the next day after you were here and are drawing their canal full and claim that it will hold up for two weeks which is three times as long as I can get out of it at 30 feet per second: which will dry us up again in a few days they still have Beaver meadow Reservoir

very truly yours

Wm McGinnis

P.S. July 13-1942 there has been a long time geting this as the Gamboles were not home and and we wanted them; and some are afraid to pay out a dolar

Resp Wm McGinnis

Burntfork Wyo July 4 - 1942

aplication to Utah State Engineer for a water commissioner: to handle and contiol the Burntfork Irrigationd wat in Utah of all Diversions that ar within the Burntfork Area: so as tha all users can have Irrigational wa and that no one may take all ar any water who has no rightful us of same.

we the under signed do beg of th State Egineer to apoint Frank C Mohney water commissioner: who hav lived in Utah and Burntfork for mor years and have helped to construct most all of the Utah Burntfork Irriga Devissions: and in no way have an interest except fairness to all: and will aply his every effort to follow the State Engineers orders in all his work at the Rate of Six Dolla per Day when called to serve as commissioner: and is to be payed by the aplicants and all who call for his services in a gurantee by the aplicants that they will all pay ha acording to amounts of acerage which are Irrigated
