Utah State Engineer:
State Capital
Salt Lake City. Utah.

Dear Sir:

I am writing in regard to the water that has been used on the Geo. Sadler place in Daggett County. Utah.

The ditch was started from Burntfork Creek in the year 1902 and finished in the year 1903. The water has been used on this place since then.

There is no record of water filing recorded but I think we have used it long enough that we are entitled to some of it.

When the water got short last year Mr. Bullock Utah Comm. didn't turn any out for this place from the Burnt Fork Creek. I was wondering if it would be possible to have Mr. Bullock turn some this summer.

I would surely app it if you could

would inform Mr.
Bullock as to this matter.

Yours very truly,
Claude W Vallier
McKinnon
Wyo.
