THE STATE OF UTAH
OFFICE OF STATE ENGINEER
SALT LAKE CITY

WAYNE D. CRIDDLE
STATE ENGINEER

May 17, 1961

Mr. W. Moile Triplett
McKinnon, Wyoming

Dear Mr. Triplett:

I was sorry to hear that you would not accept the job as Commissioner on Burnt Fork for 1961, as I feel you did a very excellent job on the system.

Upon reviewing your report for 1960, I noted that you did not include a daily flow chart for each canal on the system. Will you make up a chart for each canal for 1960, and forward them to me, as soon as possible. In addition, would you have any objection if I edited your report, to some extent; and upon completion check it with you, that we might put the report in the official record.

original in 1960 File

I am enclosing for your convenience a number of forms necessary for the compilation of the daily report for each canal. Would you also include, on the bottom of this sheet the total number of acre feet that each canal received.

Would you contact Mr. Lyle Anderson, to give him the advantage of your experience on Burnt Fork; and give him any records you might have and show him how to work out the Priority Schedule.

I would appreciate your early attention to this matter.

OK to edit report.
W. Moile Triplett

Very truly yours,

Donald C. Norseth,
Distribution Engineer
