State Capital Bldg.
Salt Lake City, Utah.

Dear Sir;

In regard to my water right no. 28 on page 8 of the Virgin River system.

Would it be necessary for me to make application to change the point of diversion from the upper diversion point, up stream north + east several rods, thus diverting the water from the north rather than the South Side of the River. I would then run the water down the north side of the River approximately 1/2 mile connecting

it with the old ditch & also flumming a portion across the river to the South Side connecting with the old ditch there, irrigating the same portions of land.

The purpose of the change is to improve & make permanent my point of diversion. as soon the last to divert water in this division this change couldn't interfere with anyone elses rights.

If it is necessary to make this application with you please send me the necessary forms, etc, I will need. Also I would like to know the date that this law or ~~amendment~~ amendment was made.

Sincerely, David L. Foote
