St. George Utah May 25 1939

Mr. T. H. Humphreys,
Salt Lake City, Utah.

Dear Mr. Humphreys;

I have completed all of the work outlined for me to this point save one measurment. This measurment is on North Creek and requires considerable time to reach it. It was too late when I finished at Virgin last night to do it but I will get it to-day. I have made measurments at all of regular points from Richfield to here including those in Wayne County. I have examined the reservoirs that were on my route. I also contacted the Long Valley people and am enclosing a memorandum of same.

I think that it will require near two days to finish up the measurments on the Santa Clara and examine the reservoirs that are in this county.

Yours very truly
Austin J. Burton
