Ordnville, Utah.
Mar. 8th 1935.

Dear Sir: —

I have received your letter of Mar. 7th which does not answer my letter of Mar. 5th. Will you kindly let me have a full and complete answer to said letter?

In reference to the gate in question, I have requested this gate moved several times, and think that you still don't understand conditions. Refering to Law under Sec. 68. Every person using water in this State shall construct and maintain a substantial headgate and measuring device at each point where water is diverted or turned out.

Since I placed the gate, Mr. J. L. Bowers has moved his diversion point a considerable distance up the creek, without moving the gate.

I have at hand your letters of July 12 and Aug. 13th 1934 in which I am threatened with court restrictions, without cause.

Yours Yours

David L. Foote.
