Orderville, Utah.
Feb. 13th 1933

Dear Sir:—

As Walter Carpenter, of Glendale was acting as, water Commissoner, on the Long Valley Division, during the season of 1933, he delayed getting me my water, while he wrote your office to learn just what a third class water right was. Did you receive such a letter, along the last of Aug. or first of Sept. 1933? If so will you please send me a copy of the letter?

Will you let me know just the number of letters your office has received from J. L. Bowers, at any time, requesting a Water Commissioner or, complaining of the distribution on the water?

On which end of his ditch, is a water-user supposed to maintain

a control gate and weir, for the purpose of controling and measuring his water according to state law.

Respectfully
David L. Foote.
