Orderville, Utah.
Aug. 11th 1934

Dear Sir:—

In regard to the distribution of the water in our Long Valley Division, I must have a clear understanding, to know just what to do to have the use of my water.

I have at hand, a letter written by you, May 6, 1933 in reply to my request of May 3, 1933, for a water commissioner. You state that, within your judgment it is not necessary to appoint a water commissioner, up until that time for the reason that, out

of thirty water users, I am the only one to make such request. I would infer from this statement that you do not understand the situation. I am the only user on the division, of the residue, and as the water users divert their water about the middle of May they take practically all the water, having all they are entitled to, and a considerable more, as there is no Commissioner to prevent it, until about the middle of May.

Since this is the third

time, that I have asked your office this question, and have so far, failed to get an answer, will you kindly make a clear answer to this question? 'What is the proper step for me to take to have the use of my water'

Will you kindly see that J. L. Bowers, places a control gate and weir in the head of his ditch

Yours truly
D. L. Toate
