Orderville, Utah
May. 18th 1934

Dear Sir;—

I am inclosing an exact copy of a letter, received by me from W. S. Carpenter Water Commissioner of the Long Valley Division.

Since he refused to act, I went down to Bower's gate and set and locked it on his exact amount.

Carpenter went down immediately, and broke the lock off, and raised the water to 1½ inches, and the weir gage is at least ¼ inch high.

Since Carpenter states that he will take orders from the State Engineer only,

I am asking you to see that Carpenter goes at once and correct the weir, and set the gate on the 1¼ inches due Bowers. And also place a lock, or legal notice on the gate, according to law.

Respectfully
D. L. Foote
