Orderville Dec. 26, 1930.

Geo. M. Bacon,
State Engineer,

Dear Mr. Bacon;—

Enclosed find bill for Labor for Water Commissioner, Longvalley Dictrict, Virgin River.

You will notice I was only to receive $75.00 for the seasons work, but we had some floods that caused more labor so I talked with some about it and they said they could fix it up some way, perhaps there were some left over from last year. Mt. Carmel's irrigation Sect. (Earl Sorenson) asked me if I could take some hay for their Assesment; I told him I could and report it to you, which was $12.50 so he

he brought me the hay.

Joseph Brooksby gave me 50 cts and I told him I would report it to you.

Thats makes a total of $13.00 which I have received to be deducted from $22.00 which leaves it only $9.00 if you have any left from last year. Yours truly,

F. A. Porter

Water Commissioner
