State Engineer
State Capitol.

I am writing you at this time to let you know that we are not satisfyed with the devison of the water between us and Orderville, and Glendale, Today we havent enough water to do any thing with and Glendale, and Orderville's lots has have plenty, This happens about every week The way it is no man can keep it divided, Their dams are higher than the head's of their ditches and the water stands with a head of from 18 in to two feet, if it is a hot day and the water drops they get the same stream minus the pressure, and we get the drop, we have aske Orderville to put in a devison gate for the last ten years but they forbid one being put in, this summer we went and meet with the Orderville Board, and aske them to put one in, and they agree with us that it should be done

their are days that the water hardly reaches us at all,

Ward Bish ric

and they would see to it. but when the stockholder got wind of it they stoped it. The water commissioner A. T. Porter says that it is the only way to devide the water and has wanted to put one in, We ~~suf~~ have aske Orderville to put all the water in the head of their ditch and a good measureing gate put in according to shairs and our shair turned back in the creek, once don and this truble would be over, the water commissioner could keep it devided and we would all share alike. all they will half to do is to rais their gate and all the water will come in, with no damage to them at all, we are askeing you to help us in this matter, Mr Porter tills me he will gladely put thim if you will give him the privilige and right to do so, we put this as a sitution to our trubbles and aske you to see to it at once. Yours Truly

Esmer Lamb
