WATER RIGHTS
OFFICE

Dear Sir:

Would you please help us with the distribution of the water on Alvey Wash.

We fully agree with your findings and the book as it is now printed, but it seems that we still do not get any water. We hired Kelley Construction Co. to put in a damn only to have Mr. Wilson block it off for us every morning and then he broke the damn. Every time we try to take our share of the water he stops us. This is the way it has always been, a fight for every bit of water we used.

Our ground is very dry and we really need the water now.

Thank you.

Sincerely,
Thurman Spencer
