Mr. Frank Reese
Office of State Engineer
403 State Capitol
Salt Lake City 1, Utah

Dear Mr. Reese:

Attached hereto is the Table No. 1 for the water uses of the Little Bear River System.

The Hyrum Irrigation Canal Company and the Wellsville - East Field Canal Company have a right based upon the flow in Little Bear River. The quantities shown on the enclosed table does not show the allowance based upon this right. The quantities are the actual flow through their canal. This appears to be the way Mr. Linder made his Table No. 1.

I will have a sheet with the flow based upon the rights of the two systems in the report. I hope I can get this to you soon.

Very truly yours,

Erwin U. Moser

Feb. 26, 1958

Mr. Frank Reese
Office of State Engineer
403 State Capitol
Salt Lake City 1, Utah

Dear Mr. Reese:

I am very sorry, but I discovered that I had made a mistake in the quantities for the adverse users in the Table No. 1 that was sent to you on Monday. My total acre feet is 226.75 instead of 247.44 acre feet as the first paper showed.

I have checked the enclosed table carefully, and I believe it is now correct. It must have happened in converting the hours of use into fractions of days. It no doubt would have showed up if I had prepared this table No. 6 immediately after I finished Table No. 1.

I hope that your work is not upset by this error. I have had time to check part of Table No. 1, and I believe it is OK, other than this part.

Very truly yours,

Erwin U. Moser
