Geo M Bacon
State Engineer
Salt Lake City

AUG 21 1926

Dear Sir

On June 10 you notified the Twin Creek Irrigation Co that we owed your office $137.88 for service rendered by your agent Don Jensen in distributing the water of Twin & Cedar Creeks. There was no other information contained. Your letter was given to our Attorney A. H. Christensen who asked you for a statement. On June 24 you rendered a statement which revealed the fact to us that only part of the water claimants had been assessed. We therefore failed to report our portion as asked for.

For your information will say there are two Companies known as Mountain Stream ommitted. and two large high water appropriations also left out. we know not why. These are vitaly concerned.

We did not know of any complaints regarding the distribution of the waters of these creeks since the agent from the State office was here three years ago Mr Bowen. whose report

was to the effect that our local man was competant and conscientious in his work.

We think that it might be well for you in the future to ascertain the need for a man before sending one. We were never notified about his coming untill he was on the job.

We trust that you will note the contents of this letter and make proper adjustments of the expenses in question when this is done we are ready to meet our just portion. We remain yours very sincerely
