Mr Geo M Bacon

MAY -7 1926

State Engineer

Dear Sir:

Refering to your Form of May 3rd stating you believed you had a man to distribute waters of Twin & Cedar Creeks of Sanpete Utah etc and wondering about price, we could stand to pay will say as said before if all the waters distributed bear the expense there are about 3000 acres or shares

We paid Mr Brand 150 pr mo and furnished gratis horse & saddle

We could stand that, We would like a good man even if we should have to pay a little more

The spring has been somewhat cool and the snows have been held back whenever the weather turns warm the water will come quickly Our high water usely starts along near middle of may say around the 15 to the 20th varying with the weather

Thanking you very kindly and hopping that your efforts may prove successful

I am respectfully

C W Sorensen
Secy Cedar Creek High
