Geo M Bacon
State Engineer

Dear Sir:-

Replying to your recent favor with reference to the amount of water in this district to bear the expense of an engineer during the high water period etc. beg have to say. The class that feel aggrieved and dissatisfied with the manner of the handling of the water there is not above 1000 shares mostly 2nd day water but there is actually in the district covered by this peculiar drainage area and handled by the Watermaster or the engineer that distributes paid water some 3000 shares. If all the water distributed helps bear the expense it would not bear so heavily on any one but if only the protestants bear the expense it will be heavier but we proposed rather pay some considerable expense per acre to obtain our right than to lose our interests. We are still hoping for a man from your office even he were not so competent as to be entitled to the title of Engineer. You remember perhaps that a Mr Board handled it one year. We can not pay so much for him as a man qualified and energetic in the discharge of his duties.

Thanking you very carefully
I am respectfully
C W Sorensen
