## PROOF OF BENEFICIAL USE OF WATER STATE OF UTAH

1.	TYPE OF PROOF								
	Appropriation	Change	Exchange						
	Water Right No.	Application	No						
	Other Water Rights Under This Proof (applicable to proofs of change only).								
2.	OWNER DATA (Applicant submitting proof MUST be the current owner of record.)								
			Telephone						
	Street or Box No.								
	City	State	Zip						
3.	CityQUANTITY OF WATER		cfs and/or	ac-ft.					
4.	SOURCE OF WATER								
5.	POINT(S) OF DIVERSION (M	Must be based on a competent 1	and survey; all ties must be given	by rectangular					
	coordinates with reference to a regularly established U.S. land corner.)								
	Location:								
				_					
	Address (if applicable)								
	Description of Diversion and Carrying Works:								
	Bescription of Biversion and Car								
6.	POINT(S) OF REDIVERSION	I (If applicable, same format as	diversions.)						
•	Location:								
	Description of Works:								
7									
1.	POINT(S) OF RETURN (If applicable, same format as diversions)  Location of Return to Natural Stream/Source:								
	Location of Return to Natural Str	cum/source.							
	Amount of Consumed Water:		cfs and/or	ac-ft.					
	Amount of Returned Water:		cfs and/or						
8.	STORAGE (If applicable, descri	ibe reservoir, lake, etc.)							
	Facility Name (if any):		Capacity:	ac-ft.					
	Storage Period:	From:	To:						
	Dam Height:		Inundated Area	acres.					
	Legal Description of Storage Area (by competent survey):								
9.	SUPPLEMENTAL WATER RIGHTS FOR THE PURPOSES DESCRIBED HEREIN:								

Irrigation:	From/	to _	/	_		
	Total Acres _			Acres	under this right:	
Stockwatering:	From/	to _	/	_		
	Number and	Kind of Sto	ock			
Domestic:	From/	to _	/	_		
	Number of Fa	amilies		and/	or Number of Persons	
Municipal:	From/	to _	/	_		
	Name of City	, District, e	etc			
Mining:	From/	to _	/	_		
	Mine Name_			Min	ing District	
Power:	From/	to	/	_

## MAPS AND DRAWINGS (Must comply with rules and standards established by the State Engineer.)

These documents shall be based on competent land surveys, signed and stamped by the licensed engineer/surveyor, and submitted on standard drafting medium that is durable and reproducible with all information legible and in black permanent drafting ink or other media of equivalent durability. Standard mapping conventions must be used (north arrow, scale in both written and graphic form, legend describing any symbols, etc.). Lines must be distinct. Shading or hatching may show irrigated acreage, but the boundary of the irrigated area must be delineated. All property surveys must tie to the section-township-range survey for the area of use, and basis of bearing for the bearings must be shown. Any public roads or other access information near the surveyed property should be shown. The most convenient map sizes are 8 ½" x 11" or 8 ½" x 14", particularly for irrigated acreages of 5 acres or less. Maps of small parcels should be drawn to the largest scale practical and at the least 1"=300'. There must be at least 1¼" margin at the top and ½" margin on the sides and bottom. The title block should appear on the lower right-hand side of the page (the short side being the bottom). If a larger map is needed, the dimensions should be 24" x 36" with the title block in the lower right-hand corner (the long side being the bottom). The title block must include the water right number, application number, survey date, the applicant's name, proof professional's name and license number, and the section, township, and range of the described parcel(s). Maps must not be folded.

Proof for	Water Right Number	Application Number						
12. WATER	Proof for Water Right Number Application Number  WATER MEASUREMENT (Provide sufficient details to enable the State Engineer to compute the quantity of							
	water measured in each case, including current meter notes, rating table, field observation notes, etc.							
	Measurements must be made by engineer/surveyor or his/her authorized representative and may be made by							
	vessel, weir, meter, rated flume, reservoir capacity table or other standard method. Where the source of supply is of fluctuating nature, a series of measurements should be submitted to show the variation and period(s) during which flow is available. The maximum diverted flow and/or acre-footage cannot exceed that approved in the application. If larger amounts are measured, control devices should be described.  Date(s) Water Measured
