BREEDER OF
COTSWOLD SHEEP & BARRED ROCK CHICKENS

Mt. Emmons, Utah, June 20 1930

Geo M Bacon State Engineer
Capitol Bldg. Salt Lake City Utah.

Dear Sir:

I have a piece of Indian land located in Duchesne County that has gone swampy and want to transfer the water to my homestead which has a Dry Gulch Irr. Co. water right.

The Government has approved the transfer so I am writing you as to what course to pursue with reference to your office.

I under stand the Indian Irr. service will hafto do this for me, but what about canceling the Dry Gulch filing that is on my homestead.

These two pieces of land are all under the same canal system and are 40 acre tracts it is merely just a transfer of placed use.

Very Truely Yours
Chester H Hartman.
