State Engineer
mr Bacon

are you the man that stands at the head of the Distribution of water in this State if so Please Come out here to Lafoint I have never seen watter needed so bad on the Crops, and I have never seen so much waste in water if you will Come to me I will show you just what is going on. The white Rocks Indian School has a bout one half second foot of water and to get this to the School they Run it a bout 4 or 5 miles down the River bed and yesterday they had 14 teen second foot of water turned out to Reach them or a Loss of 13½ foot the same date the white Rocks Canal which I am a Stock holder in had only 12 Second foot for the white Rocks

and Ouray Valley, on the Same date there was a bout 135 Second foot turned down an other River Bed for the Moffat Ditch & the Colorado Park ditch and the Henry Jim ditch and half of this is wasted, and this has went on here year after year. and no attempt of remedeing it, how long must we white Settlers Suffer because of this neglect and wast of water by our federal Gouerment, Mr Bacon our water is not being distributed according to our filings Except the Gouerment water all the Rest is according to the acrage under Cultivation, is this Right does our early fillings mean any thing or do they not, what Gives a Priority Right, you have the filings in your office. now Mr Bacon I made this investigation yesterday and if you are not the Proper Aurthority; (over

fas to appeal to Please Send this
to the Proper onl, Respect-
C A Thompson
