Brigham Utah
April 28 1938

J. H. Humpherys.
State Engineer.

Dear Sir:

I am very sorry for the inconvience caused you.

When Mr. Lowe communicated with you on April 16 he made out the petition stating I should get at least 25 % of those interested to sign. I did not think it necessary to state, the percentage of those signing, on the petition

The neglect to date it was just an over sight. Every one had signed prior to the 21st of April.

These nine persons are the ones most affected and are very desireous of discussing their problems with you. There is another group of about the same number who lost some water

but who were not interested in signing. The whole group figure the State Road Commission has not returned the amount of water they diverted.

There is at least 1½ second feet going out the end of the drain that is going to waste. As one of the problems of your office is water conservation they would like to discuss the saving of this water with you. ~~the~~ This water could be used to good advantage and with it returned to the land we think there would be plenty of water for every acre.

I thank you for your interest in this matter and trust we shall hear from you soon

(Inclose find) Yours Truly
petition
