September 24, 2009

Dear Mr. Jones,

Enclosed is a prepared statement on my assessment of the impact the proposed agreement between Utah and Nevada sharing water in the Snake Valley will have on Utah State School and Institutional Trust Lands.

Yours truly,

Harvey L. Hutchinson, RCE

Enc

WATER RIGHTS
SALT LAKE

Utah – Nevada Snake Valley Water Sharing Agreement Cannot Take School Trust Lands Federally Reserved Water Rights without Compensation

I. THE SCHOOL TRUST LANDS HAVE FEDERALLY RESERVED WATER RIGHTS THAT THE STATES OF UTAH AND NEVADA CANNOT REMOVE WITHOUT COMPENSATION

1. **The Utah - Nevada Snake Valley Water Sharing agreement is Illegal unless it includes Compensation for the Taking of School Trust Lands Federally Reserved Water Rights.** As proposed, the agreement is illegal because all of the stake holders are not a party to it. The State of Utah School and Institutional Trust Lands Administration is trustee of 140 sections of land with water rights. These SCHOOL TRUST LANDS are mostly made up of Sections 2, 16, 32, and 36 in each township, and comprising approximately 89,600 acres of land in the Snake Valley. (See enclosed map.) As proposed, the loss of ground water from these sections of land would greatly reduce the value of the SCHOOL TRUST LANDS and would not comply with the Utah Enabling Act of 1894 by which the United States Congress set aside these lands in a trust for the education of the people of the State of Utah and reserved sufficient water rights for these School Trust Lands for that purpose.
2. **The School Trust Land Patents Conveyed the Federally Reserved Water Rights to the State of Utah School and Institutional Trust Lands Administration.** The following quotes from some of the patents that conveyed lands from the United States to the Utah State School Trust Lands Administration (SCHOOL TRUST LANDS) explain and convey the rights, priority and conditions transferred with the School Trust Lands:

“The area described contains 1,948.39 acres, according to the Official Plat of the Survey of the said Land, on file in the Bureau of Land Management:
NOW, THEREFORE, KNOW YE, that the UNITED STATES OF AMERICA, in consideration of the premises, and in conformity with the said Act of Congress of June 21, 1934, and as evidence of the title which was granted to and vested in the State of Utah to the above described lands on January 4, 1896 for the support of common schools, as aforesaid, and in confirmation of such title for such purpose.”

The lands were vested in the State of Utah for the education of the people. The word “vested” is important not only at this point, but is used in federal laws to describe a specific type of water right as discussed further below. As included in the patent, the only purpose for these School Trust Lands is to make money to be

RECEIVED

SEP 28 2009₁

WATER RIGHTS
SALT LAKE

used for the purpose of financing schools and education and is in accordance with the language of the Utah Enabling Act. Quoting the patent further:

“HAS GIVEN AND GRANTED, and by these presents DOES GIVE AND GRANT, unto the said State of Utah, and to its assigns the lands above described; TO HAVE AND TO HOLD the same, together with all the rights, privileges, immunities, and appurtenances, of whatsoever nature thereunto belonging, unto the said State of Utah and to its assigns forever;”

The word “all” in the above patent language indicates that “all” rights were given to the SCHOOL TRUST LANDS. That includes water rights Congress reserved for these lands to accomplish their purpose of supporting the schools of the State of Utah. The sections of land given to the SCHOOL TRUST LANDS had not previously been patented (given or claimed by anyone). Each section deeded was owned entirely by the United States and no part of it (land, water, minerals) had ever been claimed by anyone. Each section was given with “all the rights, privileges, immunities, and appurtenances of whatsoever nature thereunto belonging” to the State of Utah to be used in the financing of the common schools.

Further, Section 20 of the State of Utah Enabling Act of 1894 contains language that cancelled any United States laws that would conflict with the rights transferred to the SCHOOL TRUST LANDS. Section 20 also cancelled then existing Territorial Laws and pre-empted later State Laws that might conflict with the rights on SCHOOL TRUST LANDS? The patent reads further:

“...subject to any “vested and accrued water rights” for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights as may be “recognized and acknowledged by the local customs, laws, and decisions of courts;” and there is reserved from the lands hereby granted a right of way thereon for ditches or canals constructed by the authority of the United States.”

The statement in the patent “subject to any vested and accrued water rights” is significant on three points: (1) It is the language of Sec. 9 of the federal Act of July 26, 1866, (2) it sets the priority date of the School Trust Lands water rights to the effective date of the creation of the State of Utah (January 4, 1896), and (3) it mentions two different types of rights: vested and accrued. The dictionary states vested rights are **a.** settled, complete, or absolute; without contingency. Said of property or a right. **b.** Having unqualified present or future possession of a property or right. Accrued means to become enforceable or permanent.

Simply stated, all water rights that had not vested or accrued at the time of transfer of the land go to the School Trust lands. There are no water rights that had accrued or vested to anyone before transfer to the State Trust Lands. Thus, the water rights were transferred

RECEIVED

SEP 28 2009

WATER RIGHTS
SALT LAKE

with the land. Later laws cannot divest the State Trust Lands of the water rights it received when it received the land.

The next phrase in the patent also comes from the Act of July 26, 1866 reading: “recognized and acknowledged by the local customs, laws, and decisions of courts,” The “local customs” would be the State Engineer, the “laws” would be the Utah Enabling Act of 1894, and decisions of courts vested all rights, privileges, immunities, appurtenances (See the same wording in the enclosed Patents #1225306 dated 12 April 1962; #1226305 dated 12 April 1962; and #1226307 dated 12 April 1962). The import of these patent clauses sets the priority date for the School Trust Lands federally reserved water rights to that of the effective date of reservation, which is January 4, 1896.

As evidence that the actions of the United States in patenting lands to the Utah State SCHOOL TRUST LANDS has been consistent for more than a hundred years, I have enclosed Patent #43-2001-0014 and 43-2001-0018 dated 19 January 2000. The language in these patents is the same as the language in earlier patents. I quote:

“NOW KNOW YE, that there is, therefore, granted by the UNITED STATES, unto the **State of Utah, School and Institutional Trust Lands Administration**, the lands described above; TO HAVE AND TO HOLD the said lands with all the rights, privileges, immunities, and appurtenances, of whatsoever nature, thereunto belonging, unto State of Utah, School and Institutional Trust Lands Administration, and to its successors and assigns, forever; and . . .”

No right was left out of these patents from the United States. The word ALL includes everything the United States had— even the water rights. (Copies of the Patents are enclosed.)

3. **No School Trust Land water rights can be removed from any School Trust Lands without conveyance by actual deed and without compensation for the water rights removed.** In 1967, in the case C Lassen v. Arizona Highway Dept. the United States, the Supreme Court decided that the School Trust Lands Administration must be fairly compensated for any sale, lease, or use of any right or part of their lands. I quote:

The Enabling Act unequivocally demands both that the trust receive the full value of any lands transferred from it, and that any funds received be employed only for the purposes for which the land was given. First, it requires that before trust lands or other products are offered for sale they must be “appraised at their true value,” C Lassen v. Arizona Highway Dept. 395 U.S. 458 (1967)

Thus, full value must be received for any water rights removed from State School Trust lands and the State of Utah has no trustee power to convey away these rights without full compensation.

RECEIVED

SEP 28 2009 3

WATER RIGHTS
SALT LAKE

4. **School Trust Lands do not belong to the State of Utah, but to the School Trust Lands for education of children and cannot be conveyed by the State of Utah by agreement or otherwise.** The Supreme Court's strong statement about paying for any resource taken from the TRUST LANDS requires full value to be paid to the TRUST LANDS. However, the State of Utah claims that all water in the State is theirs and should be adjudicated by the State Engineer. The State of Utah DID NOT compensate the TRUST LANDS for the water deeded to it by the United States in the 1894 Enabling Act – therefore they do NOT own the water rights on the TRUST LANDS – neither the surface water nor the ground water. By State law appurtenant water rights can only be transferred by actual deed. Utah Code Ann. 73-1-10. That conveyance must be by the STATE SCHOOL TRUST LANDS, and cannot be conveyed by the State of Utah. The proposed contract if entered into as is would use the rights, privileges, immunities, and appurtenances of whatsoever nature embedded in the STATE TRUST LANDS with no compensation. That is against the intent of the Utah Enabling Act of 1894 and cannot be done without deed from the STATE SCHOOL TRUST LANDS.
5. **The State of Utah legislature cannot pass laws claiming the state owns the waters that have previously been conveyed by the United States to the State School Trust Lands.** The State School Trust Lands water rights received from the United States cannot be taken away by any act of the Utah Legislature. All water rights received by anyone subsequent to the transfer of such rights by the United States to the State School Trust Lands are inferior to the State School Trust Lands.
6. **If the TRUST LANDS do not receive fair compensation for the water on their lands, Utah's school children will be required to ILLEGALLY subsidize the Las Vegas water supply with their education money.**

II. COMPENSATION TO THE SCHOOL TRUST LAND FUND

About How Much Compensation Should the School Lands Receive?

- A. If one acre-foot of consumptive water were used on one acre of these TRUST LANDS to grow a bio-fuel crop such as switch grass, and then the grass sold for making bio-fuel, the revenue would be approximately \$1000 per acre per year.
- B. Do the TRUST LANDS have the right to lease their land or rights on the land? They do with proper compensation.
- C. How much is land with an acre-foot of water on it worth in Las Vegas? To answer that, I will give a personal example.

RECEIVED

SEP 28 2009

WATER RIGHTS
SALT LAKE

In 1970, my boss took me out in the California Desert and we stopped on the road at the edge of Metropolitan Water District of Southern California's border. He said the land outside the District's border was worth \$5,000 per acre, while the land just across the street inside the District's border was worth \$250,000 per acre. Why? Because that land had water on it. Today the water makes the lands even more valuable in Las Vegas.

- D. In my opinion, compensation of AT LEAST \$1000 per acre-foot of water per year indexed for inflation to the TRUST LANDS should be received.

III. CONCLUSION. The Utah – Nevada Snake Valley Water Sharing Agreement cannot be entered into by the State of Utah unless Compensation is provided to the State School Trust Lands. Otherwise, millions of dollars will be lost from the Utah educational system.

I urge the Governor to not sign the Snake Valley Agreement without providing for the school children of Utah.

I urge the Governor to determine that the lands transferred to the State School Trust Lands from the United States includes water rights appurtenant thereto which water rights will provide significant additional funding for the education of the children of Utah

Respectfully submitted,

UTU-79162-FD

28. Domestic livestock grazing use by Ray Edward Lyman, as holder of grazing permit No. 433110, for the Sugarville Allotment (#04409). The right of the permittee to graze livestock pursuant to the terms and conditions of their permit and this clause shall expire on 1/31/2007. Annual fees based on 131 animal unit months (AUMs) for grazing use of subject permit in an amount to coincide with the authorized Federal grazing fees as published annually in the Federal Register, shall be paid to the Patentee.

Further subject to all applicable provisions of that certain Utah West Desert Land Exchange Act of 2000, Public Law 106-301 (114 Stat. 1059).

IN TESTIMONY WHEREOF, the undersigned authorized officer of the Bureau of Land Management, in accordance with the provisions of the Act of June 17, 1948 (62 Stat. 476), has, in the name of the United States, caused these letters to be made Patent, and the Seal of the Bureau to be hereunto affixed.
