RECONSTRUCTION FINANCE CORPORATION

WASHINGTON

May 31, 1935.

Mr. Humphreys, State Engineer,
Capitol Building,
Salt Lake City, Utah.

Re: Elwood Drainage District,
Box Elder County, Utah,
Docket No. Ref. 373.

Dear Mr. Humphreys:

This Division has an application for a refunding loan from the Elwood Drainage District in Box Elder County.

The land in this Drainage District receives its irrigation water from the Bear River Canal.

Our appraiser, who investigated this project in the field, states that during the 1934 irrigation season, the surface of Bear Lake, at a new low, was 12 feet below the bottom of the outlet.

He also states that on January 15, 1935, Bear Lake contained 242,000 acre feet of water.

If you have any recent data regarding the elevation of water in Bear Lake and the amount of storage, will you please inform me of present conditions.

Any information you can give me regarding the adequacy of irrigation water for this Drainage District will be greatly appreciated.

Yours very truly,

L. H. Strom

L. H. Strom, Engineer,
Drainage, Levee and
Irrigation Division.
