Boulder Utah

The State Engineer
Salt Lake City Utah

Dear Sir..

In as much as The Boulder Irregation & Reservoy Co have devloped What is nowns as the Spectial Reservoy, now and as we are Having some difficulty in determining the primary watter rights in the Boulder Creek.

at a public meetting held by the Boulder I. & R. Co June 8-1933 it was voted by a majority of the members Present that we ask the State engneer to enterpet the mc carty Decree as to Wheather It decrees the entire stream or 24 S. C. F. Should there be more o.

Less. The dificulty is whether the deviders should draw water in propation to 24 S. C. F or on a bases of 32 ds and 36 ths. of the Sheam as what deviders that are in now does. as it now Stands we have no Way of deviding the Reservoy watter from the Primary watter untail ~~the~~ the Primary rights or settled on There fore will give us your interpatation of the M C Carty Decree on the watter of the Boulder Creek It is especialy urged ~~that~~ By the New Home steaders that are devloping New Land and devloping these Reservoys for the purpos of making Homes, that you put an interpatation on the above mentioned Decree.

Or recomend some one to us to go to for this information. and advice as to how to Proceed,

Very Truly yours
Boulder Irrigation & R Co
By E.H. Coombs
Sectary.
