just in time to give my paper to him. All the papers were ready to go to Provo said Judge Moose, I saw them all bunched up on the table. They wanted to do the business about my land without me would do as they please not according to the United States laws. Therefore I fight for right and truth, and always will. I am a good American, have been a taxpayer and a license payer for 25 years, never been to Court before. I would never believe it that people told me that it was better that I dont fight in Court I dont have so much money as they have. - I can not help that the Supreme Court could not fix it I have done all the work asked and paid for it all. I have been fooled and insulted under the County all thru my work. I have begun making a reservoir, I maked the first use of Deer Creek so I should have the right they took my land against the laws of the United States, and now they are trying to take the water too. I have said in the Court that they did int have any athority to take what belongs to other people and we shall fight so many years to keep what belongs to us I hope you will be able to look after this matter they want to get all they can whether rightfully or not they must pay me. Very Respectfully Johannes Finl Andersen
