Tooele County Civil No. 650306049 (15-4)

**NOTICE TO WATER USERS WITHIN THE ABOVE-DESCRIBED DRAINAGE AREA:**

Pursuant to the order of the Court dated February 17, 2010, this is your copy in CD form of the Proposed Determination of Water Rights in the Tooele Valley Division, Tooele City Subdivision, Area No. 15, Book 4, of the Great Salt Lake General Adjudication. The Division of Water Rights has prepared the Proposed Determination as required by statute for use in this matter pending before the Court. The Proposed Determination is the State Engineer's report and recommendation to the Court of how all rights in the Tooele City Subdivision shall be determined. A printed copy of the Proposed Determination will be on file with the Clerk of the Third District Court in Tooele, Utah. Additional CD or printed copies are available, upon payment of the cost of printing or duplicating, from the Division of Water Rights at 1594 West North Temple, Suite 220, Salt Lake City, Utah, telephone 801-538-7240.

You are hereby notified that under Section 73-4-11 of the Utah Code, any person claiming a water right in the Tooele City Subdivision who is dissatisfied with the Proposed Determination may object, but only in accordance with the following requirements: The claimant must file the objection in writing in the Third Judicial District Court, Tooele Department, 47 South Main, UT 87074, within ninety (90) days after being served with a copy of the Proposed Determination. Service is effective on the date the Proposed Determination is mailed or hand delivered to the claimant. The claimant should also file a copy of the objection with the Division of Water Rights at the address shown below.

This copy of the Proposed Determination was served on you, either in person or by mail, on this 15<sup>th</sup> day of November, 2010.

PROPOSED DETERMINATION OF WATER RIGHTS IN  
THE GREAT SALT LAKE GENERAL ADJUDICATION  
TOOELE VALLEY DIVISION  
TOOELE CITY SUBDIVISION  
AREA NO. 15, BOOK 4

Tooele County Civil No. 650306049 (15-4)

Kent L. Jones, P.E., State Engineer of the State of Utah,  
respectfully submits this report to the Court.

District Court , Tooele County Department, Tooele Utah, entered  
an order commencing the Great Salt Lake General Adjudication.

**1. Geographical Area Covered.** This General Adjudication, known as the Great Salt Lake General Adjudication, includes all water sources, both surface and underground, within all of Tooele County; all of Juab County, except that portion draining to Utah Lake and to the Sevier River drainage; and all of Millard, Beaver and Iron Counties except that portion in the Sevier River Beaver River, and Virgin River drainages in Utah. This Proposed Determination includes water rights in the Tooele City Subdivision of the Tooele Valley Division of the Great Salt Lake General Adjudication. The Tooele City Subdivision is the enlarged area on the map shown hereinafter. The Utah Division of Water Rights has designated this area as Area No. 15, Book 4.

**2. Commencement.** On June 2, 1965, the Third Judicial

**3. State Engineer's Activity.** The State Engineer has followed the requirements of Title 73, Chapter 4 of the Utah Code. He has given the required notices; served and published summons; completed hydrographic surveys; and taken claims from the water users within the area. The State Engineer has examined judicial decrees relating to water rights in this area, searched the files of the Division of Water Rights and searched the records of the county recorder. Prior to making the recommendations in the Proposed Determination, the State Engineer has given careful consideration to the Statements of Water User's Claims filed herein. To the best of his knowledge, no right to the use of water within this area has escaped his attention.

Pursuant to court order, the State Engineer has prepared and served the Proposed Determination in electronic (CD) form. Additional copies of the CD or printed copies of the Proposed Determination may be obtained at cost from the Division of Water Rights as explained in the Notice to Water Users on the first page of the Proposed Determination.

**4. Beneficial Use.** In preparing the Proposed Determination, the State Engineer has based his recommendations on Utah water law, including the principle that beneficial use shall be the basis, measure and limit of the right to the use of water. Utah Code Ann. § 73-1-3 (West 2004). The recommended limits of each water right, based on actual historic beneficial use, is included in the proposed determination.

Water rights may be forfeited for non-use if no beneficial use of the water right occurs for the statutory period of seven years. Prior to May 5, 2008, the statutory period in Utah Code Ann. section 73-1-4 was five years. In 2008, the Utah legislature amended the statutory period to seven years, effective on May 5, 2008. Forfeited water rights are listed in the Disallowed section of the Proposed Determination.

If a portion of a water right has not been beneficially used for the statutory period, that portion of the water right is forfeited for non-use. Partially forfeited water rights are not listed separately, but the descriptions of the water rights in the Proposed Determination are limited to those characteristics or portions that have been perpetuated by beneficial use.

The 2008 amendments exempted water rights from forfeiture for non-use under certain specified circumstances if the

water rights are owned by a public water supplier and the water rights are held for the reasonable future water requirements of the public. The reasonable future water requirement of the public is the amount of water needed in the next forty years by the persons within the public water supplier's projected service area.

**5. Water Rights.** To be included in the Proposed Determination and recognized in the General Adjudication, a water right, regardless of its nature or origin, must be represented by a valid Statement of Water User's Claim or by a State Engineer's Recommendation.

Under Utah law, water rights can be acquired in only three ways: by application to the State Engineer's Office, also known as the Division of Water Rights; by diligent use prior to enactment of the statutes establishing the application process as the sole method of appropriation ("diligence" rights); and by adverse use.

Currently, the only way to initiate a new water right is by application to the State Engineer's Office. After the State Engineer has approved the application, the applicant may proceed, within a set time, to divert the water and put it to beneficial use. After putting the water to use in accordance with the application, the applicant files proof of beneficial use and the State Engineer issues a certificate of appropriation.

As allowed by court order dated August 4, 1966, and pursuant to section 73-3-16 of the Utah Code, some water users in the Tooele Valley Subdivision elected to submit a Statement of

Water User's Claim in lieu of proof of appropriation or change.

On July 10, 1989, the court withdrew the election order, closing the Tooele Valley Subdivision to the filing of elections.

Diligence rights are based on the continuous beneficial use of water dating back to before March 12, 1903, for surface water, or March 22, 1935, for underground water. Prior to these dates, Utah statutes provided that a water user could acquire a water right by diverting and using the water for a beneficial use. After those dates, new water rights could be acquired only by application to the State Engineer's Office.

Prior to 1939, water rights could be acquired by the adverse use of a valid water right. In 1939, the Utah statutes were amended so water rights could no longer be acquired by adverse use or adverse possession.

The Proposed Determination describes all water rights with points of diversion in the Tooele City Subdivision that are known to the State Engineer to have been perfected under any of the described methods as of October 14<sup>th</sup>, 2010. Water rights not perfected by that date are not included in this Proposed Determination; lack of inclusion in the Proposed Determination, however, does not affect the validity of water rights perfected after that date.

**6. Duty of Irrigation Water.** Because beneficial use is the limit of a water right, an irrigation water right is limited by the acreage actually irrigated. The amount of water that may be diverted to irrigate the crops to maturity in a specific area is referred to as the duty.

Using the best available analytical methods and data, the

State Engineer has determined that the irrigation duty in the Tooele City Subdivision is 4.00 acre-feet per acre annually. The irrigation duty is measured at the point of diversion from the natural water source. These duty figures account for the amount consumed by the crops, the amount supplied by precipitation, and conveyance losses. The diversion of more than the recommended acre-foot limit per acre of land each year is unnecessary and would not be a beneficial use of the excess water. This duty is based on efficiencies associated with flood irrigation practices.

**7. Quantity and Diversion for Stockwatering.** Water rights for watering stock are quantified in Equivalent Livestock Units (ELUs). An Equivalent Livestock Unit represents the amount of water consumed by one large animal such as a horse or cow. The conversion of other animals to ELUs is based on the amount of water the animal consumes compared to a large animal. The acre-foot award is 0.028 acre-foot per year (25 gallons per day) per ELU. More information on annual diversion allowances for stock watering is available on the Division of Water Rights web site at [www.waterrights.utah.gov](http://www.waterrights.utah.gov).

Although the point of diversion for stockwatering rights may be identified at a specific point where water is diverted from the natural water source, there are other ways the point of diversion may be described. A "point to point" diversion recognizes that stock may drink anywhere along a stream between two points. In such cases, the beginning and ending points are identified with the use occurring between them.

**8. Quantity for Domestic Uses.** Water rights for domestic or household use are quantified in Equivalent Domestic Units (EDUs). An EDU is the amount of water to provide for the

indoor use of a household. The quantity of water is 0.45 acre-foot per year (400 gallons per day) for each EDU, or, if the water right is for seasonal domestic or household use, 0.25 acre-foot per year.

**9. Irrigation Periods.** The State Engineer has determined that irrigation in this area is beneficial only from April 1 through October 31. Like the irrigation duty, the period of use for irrigation may vary depending on the reasonable irrigation season for a particular area.

**10. Ownership of Rights.** The proposed determination includes the name of the owner of each water right as contained on the records of the State Engineer. The names of claimants to the use of water who have not updated ownership administratively, by submitting a report of water right conveyance form to the State Engineer as required by Utah Code § 73-1-10, are not included in the proposed determination even though they may have filed a signed Statement of Water User's Claim.

Ownership changes are not always timely filed with the Division of Water Rights. Thus, even though each water right is identified in the name of the owner of record, the State Engineer asks the Court to recognize in any future decree that ownership and title is determined by and according to the applicable deeds and conveyances, whether executed before or after the Proposed Determination was compiled, notwithstanding the ownership shown in the Proposed Determination.

An appropriation of water may be the result of the joint action of two or more parties. Occasionally, the name of one party appears on the records of the State Engineer even though other parties may have an equitable interest in the water right. The

proposed determination only includes the names of owners of record. The State Engineer does not attempt to identify equitable owners or to notify them of actions taken in the general adjudication. It is the responsibility of the owner of record to protect the interests of any equitable owner(s).

**11. Water rights claimed by the United States.** The State of Utah and the United States have agreed to negotiate the water right claims of the United States rather than litigate those claims. The United States has therefore not been joined as a party to the Great Salt Lake General Adjudication at this time. Therefore, the water right claims of the United States, including water right claims administered by the United States Forest Service, the United States Bureau of Land Management, the United States Department of Defense, and water rights held by or for any Indian tribe, are not addressed in this Proposed Determination. Water rights owned or administered by the United States or its agencies may be included in the Proposed Determination for information and administration purposes. The right and duty of the United States to submit claims is reserved until the United States is joined as a party to the Great Salt Lake General Adjudication, and the right of the United States to file objections to this Proposed Determination is reserved until the United States is properly served a copy of the Proposed Determination. The water right claims of the United States will be addressed in a later report and recommendation.

In addition, certain water rights result from the reservation of public lands by the federal government for a specific federal purpose. These reserved water rights are limited to providing the minimum amount of water to fulfill the primary purpose of the reservation, and their priority date is the date of the reservation.

This Proposed Determination does not address claims for federal reserved water rights. If any federal reserved water right claims are located in the Tooele Valley Subdivision, they will be addressed in a subsequent report and recommendation.

**12. Recommendation and Retention of Jurisdiction.** In accordance with his findings and determinations, the State Engineer respectfully recommends that the Court adopt this Proposed Determination of Water Rights; that the Court decree to the respective water users the water rights as set forth herein, subject to any corrections the Court orders; and that the Court disallow the water rights recommended to be disallowed. The rights described may change between the time the proposed determination was compiled and the time a final adjudication decree is entered – for example, as the result of an approved and completed change application. The State Engineer thus recommends that the Court confirm each water right as of the date the pertinent Statement of Water User’s Claim was signed or the date the State Engineer’s Recommendation was prepared. The State Engineer also recommends that prior to entry of a final

decree, the Court consider the need to retain jurisdiction over this General Adjudication to adjust the quantification of rights for beneficial uses to respond to better scientific information and analytical techniques, and to address such other issues as may be identified at that time.

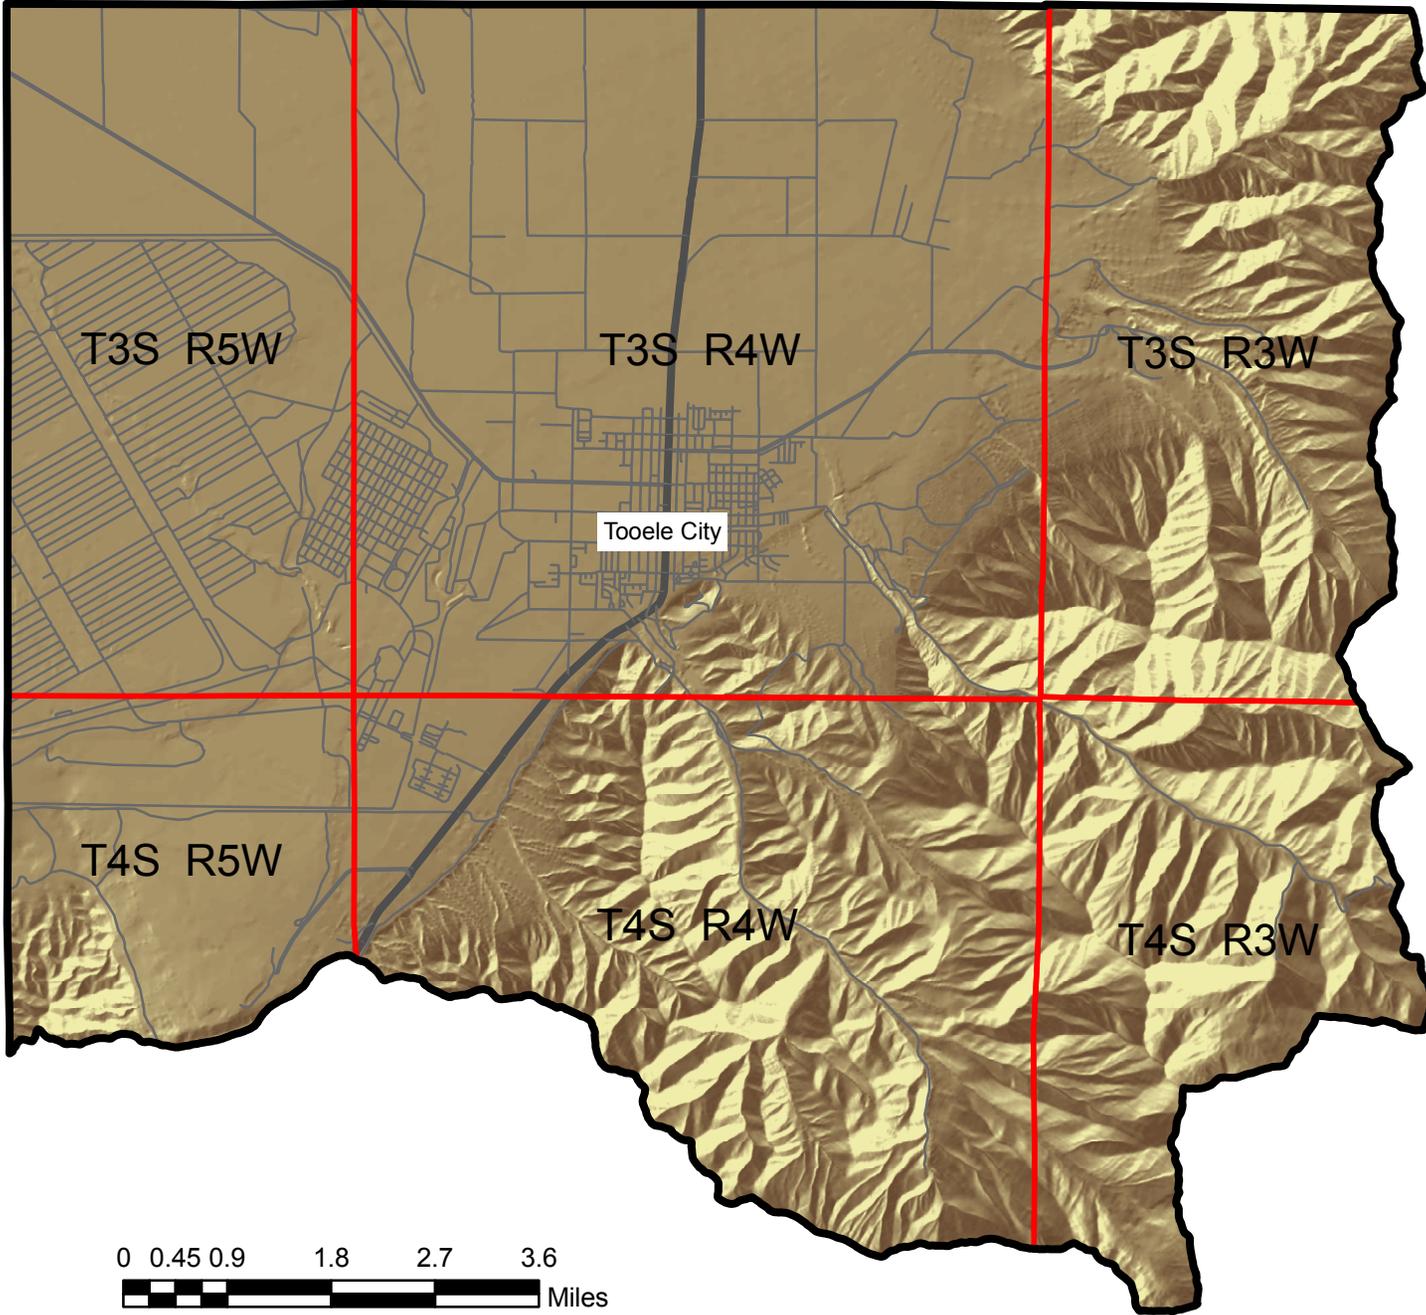

**13. Continued Assistance.** The State Engineer and the staff of the Division of Water Rights express their continuing willingness to assist the Court in this General Adjudication, as the Court requests.

**14. Date of Publication.** This Proposed Determination of Water Rights was approved for publication on the 2<sup>nd</sup> day of November, 2010.

POINT OF DIVERSION -- UNDERGROUND:  
[1] S 2650 feet W 3500 feet from the NE corner, Section 13 T 4S R 5W SLB&M

BENEFICIAL USE:

Water Use Group No. 8631.

MUNICIPAL: from Jan 01 to Dec 31 Bauer.  
Acre Feet allowed by this Right for this Use: 42.50000 acre feet

MINING: from Jan 01 to Dec 31 DISTRICT: Rush Valley.  
MINE NAME: Honerine Mine  
ORES: Lead  
Acre Feet allowed by this Right for this Use: 302.19000 acre feet

LIMITATION(s) -- Water Right 15-19 is limited to:  
an annual diversion for Municipal purposes of 42.5000 acre-feet  
an annual diversion for Mining purposes of 302.1900 acre-feet

EXPLANATORY:

Change application a21731 was approved March 19, 2009 limiting the applicant to future diversion and depletion quantities of 344.69 acre-feet and 68.94 acre-feet respectively. These quantities are based on the amount of water perpetuated by the illegal use of gravel pit washing.

In order to prepare a water use claim on the perfected uses for this water right the equivalent heretofore use quantities were calculated from the approved hereafter uses of change application a21731.

**LIMITATION(s) -- Water Right 15-38 is limited to:**  
an annual diversion for Other purposes of 181.0000 acre-feet

**EXPLANATORY:**

Water User Claim Nos. 15-38 and 15-39 represent the rights of Kennecott Utah Copper Corporation [‘KUCC’] to use water from springs and tunnels in White Pine Canyon in exchange for water from the Utah Metals Tunnel described in Underground Water Claim No. 9028 [15-210]. Water Right Numbers 15-38 and 15-39 were modified by change application a173 to divert water from springs and tunnels in White Pine Canyon, Tooele County, Utah. The change application was filed to implement a 1914 Exchange Agreement between the Utah Metal Mining Company and the Middle Canyon Irrigation Company. [exchange Applications were not authorized by statute until 1919]. The water is collected and diverted through a pipeline into the KUCC Utah Metals Tunnel to be used for miscellaneous mining uses in the operation of the Kennecott Utah Copper Bingham Canyon Mine located in Salt Lake County, Utah. The portal of the Utah Metals Tunnel in Middle Canyon, Tooele County, Utah is located North 78 feet and East 899 feet from the W4 corner of Section 9, T4S, R3W, SLB&M.

**BENEFICIAL USE:**

**LIMITATION(s) -- Water Right 15-39 is limited to:**  
an annual diversion for Other purposes of 543.0000 acre-feet

**EXPLANATORY:**

Water User Claim Nos. 15-38 and 15-39 represent the rights of Kennecott Utah Copper Corporation [‘KUCC’] to use water from springs and tunnels in White Pine Canyon in exchange for water from the Utah Metals Tunnel described in Underground Water Claim No. 9028 [15-210]. Water Right Numbers 15-38 and 15-39 were modified by change application a173 to divert water from springs and tunnels in White Pine Canyon, Tooele County, Utah. The change application was filed to implement a 1914 Exchange Agreement between the Utah Metal Mining Company and the Middle Canyon Irrigation Company. [exchange Applications were not authorized by statute until 1919]. The water is collected and diverted through a pipeline into the KUCC Utah Metals Tunnel to be used for miscellaneous mining uses in the operation of the Kennecott Utah Copper Bingham Canyon Mine located in Salt Lake County, Utah. The portal of the Utah Metals Tunnel in Middle Canyon, Tooele County, Utah is located North 78 feet and East 899 feet from the W4 corner of Section 9, T4S, R3W, SLB&M.

Historically, Water Rights Nos. 15-38 and 15-39 were used for non-consumptive power purposes in a power plant located in Middle Canyon, Tooele County, Utah. Change Application a173 [filed April 9, 1913] proposed to divert the spring waters into another basin, which would totally consume the water historically available for downstream users. As part of the approval of this change application, the predecessor in interest of Kennecott Utah Copper Corporation, and Middle Canyon Irrigation Company entered into an exchange agreement dated May 23, 1914. The exchange agreement requires Kennecott Utah Copper Corporation to release water from the Utah Metals Tunnel into the natural channel of Middle Canyon, Tooele County, Utah, in an amount of water equivalent to that taken from the springs and tunnels and transported to Salt Lake County, Utah. This compensates for the return water lost to downstream users as a result of the exchange. This exchange agreement was a condition for approval of Change Application a173. As long as the same amount of water is released downstream as is diverted from the springs and tunnels, the water diverted from the springs and tunnels can be totally consumed.

15-298,2184

**DOMESTIC:** from Jan 01 to Dec 31 SOLE SUPPLY: 57.0000 EDUs of the Group Total of 142.0000.

**LIMITATION(s) -- Water Right 15-298 is limited to:**  
 an annual diversion for Irrigation of 11.2000 acre-feet  
 an annual diversion for Domestic purposes of 25.6500 acre-feet

**EXPLANATORY:**

This right is limited to the diversion of 0.122 cfs of water during the period from November 1 to the last day of February, inclusive. During the period from March 1 to October 31, inclusive, if the flow of water in the ditch is 7.0 cfs this right may divert water up to and including 0.122 cfs, which is water saved by the concrete lining of the ditch.

The 2.8 acres of irrigation was divided up between the 57 residencies equaling 0.0491 acres per lot.

One residence was incorrectly described in the SW1/4NW1/4 on certificate 12523 so it has been corrected and mapped in the SW1/4SW1/4 matching the proof and actual location of the residence.

**LIMITATION(s) -- Water Right 15-514 is limited to:**

an annual diversion for Irrigation of 89.6000 acre-feet

**EXPLANATORY:**

The originally authorized use of water is described herein, however, the claimant has filed a change application number a20833 to amend the water use under this right. The water is proposed to be used for municipal purposes. Change application [a20833] for this amendment is being processed by the State Engineer. As part of the change application process, required proof of beneficial use documents will evidence and define the amendment.

The described place of use for this water right has not been mapped on the hydrographic survey maps. The exact location of the historic irrigation cannot be determined because the water use is no longer occurring at the heretofore location of the change application.

Water use under this right is currently not occurring. In accordance with 73-1-4[2][f], the owner has declared this right is being held by a Public Water Supplier to meet its projected water needs in the next 40 years within its service area.

**EXPLANATORY:**

Water right 15-597 has no sole supply and is used only as an additional source of supply for the beneficial uses listed under water right # 15-2184.

Change application a36133 limited water right 15-597 to a supplemental right to a flow rate of 2.66 cfs.

The Place of Use is within the Service Area of the Middle Canyon Irrigation Company.  
The Service Area is limited to that area served by the company infrastructure existing on the date the water user s claim was signed.

**LIMITATION(s) -- Water Right 15-1653 is limited to:**  
an annual diversion for Other purposes of 88.3900 acre-feet

**EXPLANATORY:**

The originally authorized use of water is described herein, however, the claimant has filed a change application number a29501 to amend the water use under this right. The change application proposes to change the beneficial use to municipal purposes. Change application [a29501] for this amendment is being processed by the State Engineer.

As part of the change application process, required proof of beneficial use documents will evidence and define the amendment.

This water right is under an approved non-use application.

**EXPLANATORY:**

In Tooele County Civil Nos. 814, 818 [1914] and 86-241 [1988], Middle Canyon Irrigation Company was awarded the right during the entire year to the use of 89.6% of all the waters of Middle Canyon Creek and all tributaries thereto, including but not limited to the waters of Big Spring situated in Angels Grove near the mouth of Middle Canyon.

The existing well identified as a point of diversion is limited to its current flow rate of 1.0 cfs.

The Place of Use is within the Service Area of the Middle Canyon Irrigation Company.  
 The Service Area is limited to that area served by the company infrastructure existing on the date the water user s claim was signed.

**LIMITATION(s) -- Water Right 15-3130 is limited to:**  
 an annual diversion for Irrigation of 1.0000 acre-feet

**EXPLANATORY:**

The originally authorized use of water is described herein, however, the owner has amended the use of water under this right. A change application [a36614] for this amendment has been filed and is being processed by the State Engineer. As part of the change application process, required proof of beneficial use documents will evidence and define the amendment.

The described place of use for this water right has not been mapped on the hydrographic survey maps. The exact location of the historic irrigation cannot be determined because the water use is no longer occurring at the heretofore location of the change application.

**LIMITATION(s) -- Water Right 15-4704 is limited to:**  
 an annual diversion for Irrigation of 1.0000 acre-feet

**EXPLANATORY:**

The originally authorized use of water is described herein, however, the claimant has amended the use water under this right. A change application [a35138] for this amendment has been filed and is being processed by the State Engineer. As part of the change application process, required proof of beneficial use documents will evidence and define the amendment.

The described place of use for this water right has not been mapped on the hydrographic survey maps. The exact location of the historic irrigation cannot be determined because the water use is no longer occurring at the heretofore location of the change application.

**LIMITATION(s) -- Water Right 15-5111 is limited to:**  
 an annual diversion for Irrigation of 1.0000 acre-feet

**EXPLANATORY:**

The originally authorized use of water is described herein, however, the claimant has amended the use of water under this right. A change application [a36519] for this amendment has been filed and is being processed by the State Engineer. As part of the change application process, required proof of beneficial use documents will evidence and define the amendment.

The described place of use for this water right has not been mapped on the hydrographic survey maps. The exact location of the historic irrigation cannot be determined because the water use is no longer occurring at the heretofore location of the change application.
