Welch				2.31		2.31											
Perkins				6.74		12.00											
Midway				6.48		6.48											
Hallet				1.41		1.41											
Gillis				.91		—	Hi water washed this headgate out										
Interstate				30.00		42.00		30.00	This was all B.F water because Interstate canal								
Bald Spring Ct.																	Brake at Beaver Meadows
																	H2O went underground came out Sheep Crk.
																	Channel change at F.S. Headgate

Burnt Fork Annual Report 1983

I made weekly visits to Burnt Fork gaging station and the upper Burnt Fork thru mid July.
High water came in June. Many users didn't use more than their rights due to a very wet spring. No ditches were shut off this year. Most of the water went down the Burnt Fork into Henrys Fork. The High water damaged several headgate. It also posed a real threat to Don Stalls house. He cleaned out the channel with a cat. He also built up and sandbagged the Bank. He also kept the flume clean of debris at the road at Burnt Fork to prevent flooding. A very different year for me. I received one (1) call for water.
