Gunn R. Dist.
6-4-64

Reynold Hendrickson, 6-mile & 12-mile user
"Gunnison Irrig. Co. is taking all of our water"

Wanted Cole to furnish measurements to show the water is not being properly distributed or some one from this office.

He was told that distribution is under water commissioners and that we will be glad to consider putting a commissioner on that area if one is needed. However this will require assessments of all the water users and measuring devices to be installed on all diversions. He was further told that we would not order Cole to measure the water and do distribution until proper arrangements are made.

It was suggested that the people "being injured" give us some data indicating improper distribution and a formal request for distribution if they feel it is needed.
