Mr Geo. M. Bacon,
State Engineer
Dear Sir,

Upon investigation of the Spring Canyon System made yesterday I found that the Eligenties were diverting through a pipe water from Goat Spring. This water according to decree goes to De Marco's six days in the week, sunday it goes to Eligenties. Upon the suggestion of Mr German no action was taken on the matter until a more thorough investigation of the records had been made, this perticular diversion being made perticularly for domestic purposes.

Since this time the De Marco's have made a demand on me as water Commissoner that I stop the Eligenties from using said water for the six day that it belongs to them. Kindly advise.

Yours very truly.

W. T. Hayman
Water Commissoner
