JUN 27 1927

Dear Sir:

I have recieved your letter and was glad that you seem to be helping me.
Yesterday night the water was less;
this Morning I have sent two men up to see the water. and they saw that on top of the ~~water~~ rock that Mr. Wayman put ~~the~~ Eliafanti put another rock on it so hardly none of the water came to me. I then phoned

JUN 27 1927

to Mr. Waymon and he
said that he only put
one rock so it would
separate the water.
this afternoon I and three
men went up and we
found the top rock was
off and it was separated
as Mr. Waymon had fixed
it, but it was only the
water of the Wash which
was separeted not the
spring. Crystal spring
was in the wash yester-
day, but today is warm.
but as I told you the
wash is evenly separated

but not the Crystal
spring.
Goats spring is the
Wash is mine and still
they take it, the Wash.
Please see that they
take the Crystal spring
through the upper ditch
not through the wash
because it coming through
the Wash they take
mine with it.
I would be satisified
if only I had this trouble
finished and the papers
of rights.
