Helper Utah June 2/27

State Engineer
Salt Lake City -

Sir.
I am asking you again about the water's named as Goat's Spring and the washes - I am continually deprived of my right's under agravating circumstance's to kill any one - Last time I Mr. Wyman the Agricultural Agent when't to let the water flow for me and a crowd of mad ~~two p~~ mob prepared ready for assault by Elegant people's tried to assault Mr Wyman I wish to tell you that here

is a strong association of them and is very hard to obtain protections of any sort - I wish that you do the best you can and bring this matter up to competent officials of law. If you don't believe me you will please to take some practice of it. I have no body to help me out, I am just a women alone -
I have 60 acres of land with fruits trees and orticoltural industry and I can not even use the water that belong to me because them peoples. Elegantly shows to use guns on any one that go ther along the canyon for me -

So you please to use your good office among the State court of officials that concern in the law to obtain protection and justice against such abuse and prepotency -
I have a big orchard and more irrigable land than Elegantis -
Elegantis only have about 15 acres, and I own 67 acres -
they waste the water and do all they can to deprive me of water that I need - I believe the Court of Equity must order distribute according to acreage and protect the development of agricolture -
Please to do the best you can

for me. I have no one to defend me against such tiranny —

Respectfully your's

Maria DeMarco
