The State Engineer
Salt Lake City Utah

Dear Sir; This is to certify that on June the 20. That Mr Knox Patterson, and a company of two car loads of men. also Mr Meaker of Greenriver Utah came to Hanksville and told me that the water from Boul Creek was running down ten miles thru a country called Dry Valley and crossed the road a distance of 15 miles from Vern Pacer. Ranch, There is no ditch, it just runs in a low place in the valley and soaks the country all around. and these men before mentioned, Mired their cars down and had to dig them out, On the 25-th of June I went out there and saw for my self that these men had told the truth for the water was still running for some distance below the road crossing. a willful waste of my water.

Resp. Columbus R, Hall
