Hankville June 19th 1928

To the State Engineer
of Utah.

My dear Sir :— Would you kindly send me by return mail some formulas in regards to measuring water. Mr. V. W. Pace insits for me to go over the same routine, concerning Bowl creek; and report to your office the findings; althou the Hall's reproved of my acts of last year.

I trust that the extortionate report of Mrs. Hall's (probably on file in your office) will not impair my standing or repudation with you. and oblige

Yours truly

F. J. Weber
