Hankville Utah
April 10, 1928

RECEIVED
APR 14 1928
State Engineer's Office

Geo. M. Bacon
State Engineer
Salt Lake City, Utah.

Dear Sir:-

Just recieved your letter of april 4 with reference to water commissioner on Bowl Creek. I cannot understand why Mr. pace ~~has~~ has objections to Mr. Johnson being appointed as water commissioner on Bowl Creek. Mr. Johnson is living here has his family here has a ranch and has a water filing in your office for his ranch, and is not so much unknown as Mr. pace represents him to be, I believe Mr. Johnson to be a very just man he has talked with Mr. pace and told him if he were appointed that he would carry out the Engineers instructions, But perhaps that is why Mr. pace objects to him.

I cannot understand why Mr. paces wishes should be considered in preference to ours, as you know and I know that he is in contempt-

of court, not having complied with any of the requirements made by your office, nor paid any of his allotments for the adjudication of this water, we ~~also~~ are the majority, C. R. Hall and Rosanna D. Hall both have water rights and much more water right than Mr. Pace

you spoke of Mr. Weber being available, I rather disagree with you as to that, Mr. Weber is in poor health and seldom leaves his home he hires all his own work done, he never rides a horse, and he doesn't have a car, it will be necessary to do some riding horse back up the creek where a car cannot get. I don't believe that if Mr. Weber were appointed that he would be able to attend to the business on account of his health and not having any conveyance whatever. Mr. Johnson has a car and his ranch is up the creek and he will be going right up our water way to attend to his ranch he lives in Hankville having bought a home and lot here and he will be available at any time that he is needed.

We ask of you to please not appoint Mr. Weber as our commissioner.

C. R. Hall
Rosanna D. Hall
Mrs. A. J. Denny.
