State Engineer's
Office

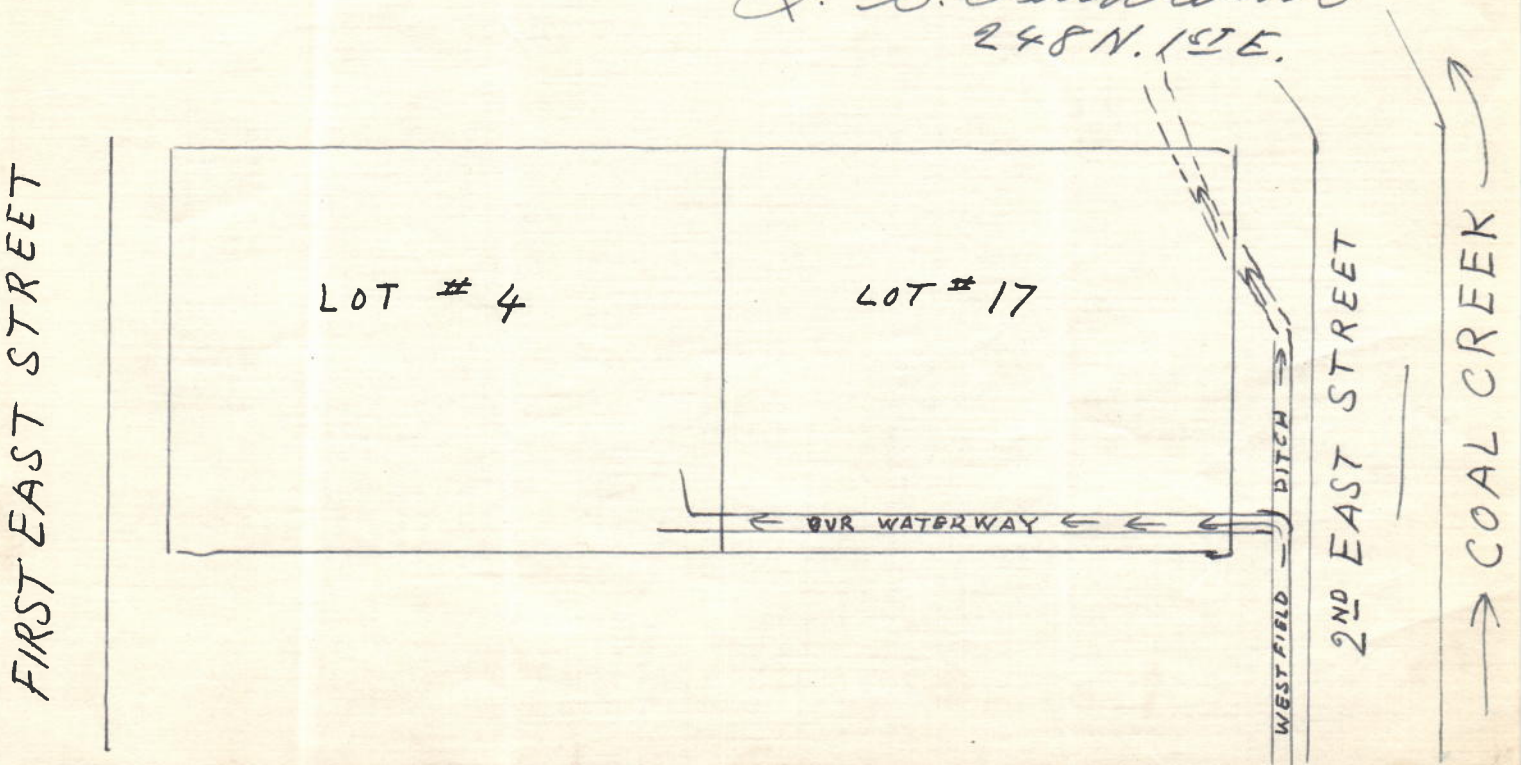
Dear Mr. Humphrey:

I am writing you with regards to a water right in Cedar City, in the west field ditch. The water has been used on a lot at 248 N. 1ST E. Cedar for many years, well over 65 years without any trouble over ~~the~~ the water until 3 years ago when we were told not to take the water until we were given notice by the west field water master, so far he has failed to do so which deprives me of the use of my ground for pasture and garden. I only want what is mine without the violation of any law, but I dont feel that I should be deprived of the water on a peice of ground after having used it for years myself and knowing that the water was used on this lot for over 65 years.

~~Until~~ Unil 3 years ago we recived notice to take the water along with other users each turn, but when the water got low is when the trouble started.

The lot which the water was used on was all S. 3/4 lot 4. Block 43 - Plat B. Cedar City town Survey.

We had to take water in a ditch on lot 17 - in the same block, so some time we would use it on lot 17 and let the waist water run on lot #4 which I cant she should make any difference or we own both lots and we had to run the water thru #17 to get to #4.

Please advise what you think I should do.


Thanking you in advance I am
Yours Truly
L. C. Pendleton
248 N. 1st E.
