T. H. Humpherys.
State Engineer
State Capitol
Salt Lake, Utah.

Dear Sir:

Will you please inform me if Edward Bentley, Parowan, Utah made application for the spring flow of excess water which came down the Breakwater in what is known as the south field. Parowan, Ut. Father told me he made such application and it was granted by the State Engineer's office. WE have used such water for the last 35 years for watering our alfalfa and farm lands.

WE have had no trouble until recently. The channel has filled up some and diverted it into one of the field ditches. WE have a hired man and I left word for him to clean out channel and get the water

thru Robert Fowler's land where it has gone for the last 50 or more years. Mr. Robert Fowler stoped him and they claim we have no right to the spring run off since Father died.

Will you please look up said application and notify me of the proper procedure to take so we can use this water as we have done for the last 35 or more years.

I will file application for it but feel Father's application makes the right to the use of the water pass to us and I feel these parties are just trouble makers.

I am enclosing this letter I received from our hired man. I also, understand we can turn such water in the field ditch and take it out if we stand our proportion of the maintenance, is such true?

I am going down Friday so would appreciate an early reply and if there is any charge I will pay it.

Yours truly,
Edward W. Bentley
Provo, Utah
