Parowan Utah
Apr. 30-39

Mr. Edward Bentley
Provo Utah.

Dear Ed,

I am writing you in regards to the water. Yesterday we had a flush of water. They turned the water out of the West field or north field and it came down the Break. It washed under my head Gate in my ditch and I went up to see if the Gate was clogged up. But it wasn't.

Morris says we can't take the water out of the main ditch so he ~~[illegible]~~ shut it off. Of course I didn't take it it came in its self.

I saw Geo Fowler and he said for me to stay out of his place. That I couldn't take a ditch through his place

In the afternoon ~~Penton~~ Pendeleton and Bob Fowler came down and said you didn't own the spring surplus and I hadn't better try to take it. So I don't know what to do. I think you had better come down next week end and get this streaghten out.

I have all the Ground planted to Grain but the peace above the house that is all I have plowed. We had a shower yesterday It helped a little.

The hay is growing and it looks good. I think our hay looks better than most of the hay. I think spring-tooling it helps. I hope we don't get a frost to stop it more.

I have a water turn Tuesday morning at 6:16 a.m. I think I'll have to water the wheat in the pasture up it is to dry to start. I started on the ditch yesterday.

Well there isn't much news so will close for this time

Yours truly

Bob.
