RE: Beaver River System Tour for Committee Members

Dear Member:

On Thursday August 19, 2010, from 9 AM-12 PM, a Beaver River system tour is being conducted from the mouth of the canyon to above Minersville Reservoir. We will be visiting selected diversions used for regulation and distribution.

This will be a good opportunity to see most of the diversions the water commissioner works with. The purpose is for Committee Members to understand the Water Commissioner's work in operation and measurement of the river, along with improvements and foster productive communication about the river operations.

Due to the expected size of the group **we are inviting only committee members** on the tour with the water commissioners.

I trust that everyone will conduct themselves in a honorable and distinguished manner that I have come to expect from the Beaver River Committee Members.

Due to time constraints this will be a diversion and measurement tour only, with a number of brief stops and not much time for discussion. If you have any questions please submit those in writing, they will be addressed at a later date.

Sincerely,

Mike Silva  
Distribution Engineer

---
