Joba, Utah.

Mar. 11, 1933.

Mr. Geo. M. Bacon, State Engineer.

Salt Lake City, Utah.

Dear Sir;-

Last summer, not long after you appointed James I. Gurr as your field representive, he had Parley Mitchell, who was using water under the N. J. Mitchell filing, arrested for taking the water when it had been turned off and he had been notifed to leave it alone.

Mr. Porter, the Co. Attorney, made out the papers, had them served and set a date for the trial, then before the date set for the trial, sent word to Mr. Gurr that the trial was posponed indefinitely because the case was still in court.

From then on they all took water as they pleased.

What steps are necessary to be taken by us that our right may be protected, or, rather, that the rights of your representative be protected this coming season?

Yours sincerely,

Sand Wash Irrigation Co.

by Melvin J. Benson, President.
