State Water Engineer! -
Dear Sir! -
I have used water out of the sand wash on my place for 25 years since 1907, the state Engineer before you contended that there was no need for filling some have informed me that there is a Ruling in supreme Court, in some cases Priority of usage gives one a right. I would like to know whether I have any right in this stream that right has always been recognized so far by Dry Gulch and by the people that have a

filling, However I have not
Been Instructed in the
law suit on this water.
I contend this is more or
less seep water although
it is a natural water
course for flood water. This
stream has 17 feet of
filling by Benson & Dry
Gulch However their
hasnt been that much
water in sand wash
at No time this year.
the stream is as small
as it was any time last
year. I would like to hear
from you in regards to
this matter at once as
they are talking a water
commisioner.

very truly yours
Claude Jarg Upalco ut
