Salt Lake City Ut.

Dear Sir,

I can accept the position of Commissioner on Sand Wash providing the prior appropriators will grant to the later ones sufficient water at all times to care for gardens and orchards. This service is worth $5.00 for each days time required. Then all appropriators will properly be assessed to to pay the expense.

It seems that the Dry Gulch irrigation company has probably been assessed heavier for this purpose than conditions would warrant. While they get a considerable water from Sand Wash, they get most of it from the flood season and very little after the commissioner is called out. Therefore it appears that

the bulk of the assessment should come from the Sand Wash Irrigation company

Say Sand Wash Ir. 45 %.
Dry Gulch " 40 %.
other users 15 %.
Pace + Cannon
Potts
Mitchell
Nelson.

As there has always been a scarcity or shortage of funds for this purpose and this season an exceptionally good year for water I suggest that the same amount as last year will probably be sufficient.

Respectfully Yours.
Robt. H. C. Marchant.
