Mr. Geo. W. Bacon
State Engineer
Capitol Bldg.
Salt Lake City, Utah

Dear Sir, Mr. H. J. Mitchell informs me that you have some especial instruction for me because of certain information which he gave you in a letter dated Jan 26th 1928. I will be pleased to recieve any instruction which you desire to give and will appreciate a letter from you which I can show him, relative to his rights in Sandwash.

Further will you write him at Upalco demanding that he puts in a suit-able head gate.

As a result of the floods in Sandwash last season Most old structures are out I find it very difficult to

regulate the water with the present condition.

As you have said nothing about a bond I am assuming that the bond of last season is sufficient as a holdover.

I am also proceeding under last years abstract.

Further I am waiting for the interested parties to get their injunction filed against Mr. Cannon before I interfere with him, as he immediately takes the water after we regulate it.

Please advise me on the above matters. and also send me a supply of white form vouchers.

Respectfully Yours
Wm. H. C. Marchant
