Soda June 1

Mr Geo. M. Bacon
State Engineer

Dear Sir; Your letter of May 28 at hand.
We have discussed this Cannon affair with the Dry Gulch officials. and we feel that the best thing to do is to take civil action in the matter.
Mr. Cannon refuses to recognize the state Engineers decision and the Co. Attorney will not prosecute on a criminal charge.
I think that Mr Marchant

suggested to your office that in his opinion a civil suit was the best way to settle this trouble.
We would like to know what you think of it.
If you think that is the thing to do. We will file a suit at once asking for an injuction against the cannon using the water until we can get a decree from the Court
We would like a commissioner appointed at once as we will need him soon, All of

the water users on the Wash
recognized his authority last
season except Mr Connor
Hoping to hear from you
soon. Resp.
