1962 Water management

Water Commissioner went to work

I went with Independant Canal & Emery up to check reservoirs this was June 4 - 1962. we Couldnt get get all the way up, but this was because of snow-drifts,

we Could see Julionses reservoir the water was running out of spillway.

June 20 we went up again, this time we were able to get to all the reservoirs Old Emery lacked seven ft. from running out of spillway. Julionses was full, Larsens was full, Spinners was full, Little Brush lacked three fet.

we were able to get the plug out of Little Brush.

They should have plenty of water, it will all come down as natural flow.

June - 28 - 1962. I went with Independant and Emery to change splitter,

There was still water going over Emery dam. we changed the splitter 20 - 80

The Independant canal Couldnt take all the water, when the water drops I will go and make the change.

Probably wont need to open the reservoirs untill the last part of July.

There was still a lot of snow at Old Emery reservoir

we worked all of the water under the Consolidation this past years

1962. Report.

	Emery	Independant Canal	
May. 6.	90.85	full water going over dam.	
May 16.	97.44	" " " " "	
May 31.	92.47	" " " " "	
June. 6.	Checked Reservoirs Couldnt get there for snow		
June. 15.	97.44	" " " " "	
6 — 20	Checked all Reservoirs still running over dam.		
6 — 26	97.44 went with to change headgate and did measure water		
6 — 28	~~97.30~~ Changed splitter, Emery got 79.30 Independant got 19.82		
July 6.	97.44	19.44	78.00
11 — 12	84.39	16.88	67.51
11 — 19	75.00	15.00	60.00
11 — 22	72.00	14.40	57.60 opened Old Emery July 21.
11 — 24	77.31	15.46	61.85
opened Larsens on July 23., opened Spinners & Brush on July 28			
11 — 29	84.39	16.88	67.57
11 — 31	80.50	16.00	64.50
